

Mr K the Kaka has now gone to Otorohanga kiwi house where he is being given blood and D.N.A. tests and from there he will go into a captive breeding program. He was a pleasure to have and we will miss him but know he will be really happy with his new life.

We have also released in the last week a kereru, a kingfisher and a petrel.

Not expecting any other releases for a few weeks unless something comes in just for R&R.
